FOR IMMEDIATE RELEASE

## **DUAL's GPS & BATTERY CRADLE ENABLES GPS APPS AND DOZENS OF NEW USES ON THE IPOD TOUCH®**

*-- DUAL's XGPS251 – The All-in-One GPS Solution Now Works with All iPod touch Models  
Enabling Apps for Navigation, Golfing, Fitness and other GPS-aware Apps --*

**HEATHROW, Fla. (Dec. 2, 2010)** - [Dual Electronics Corporation](#) announced today that its XGPS251 [Portable GPS & Battery Cradle for iPod touch](#) now works with all iPod touch models, including the iPod touch 4<sup>th</sup> generation. The Cradle, which has a built-in GPS receiver and a battery pack, adds full GPS capabilities to the iPod touch, allowing it to be used with apps that require GPS, such as apps for car and marine navigation, golfing, fitness, geocaching, hiking, social networking and more. The Cradle comes with a Windshield Mount, which conveniently docks the iPod touch in a car or a boat when used with apps for navigation.

“It is always fascinating to me to learn what uses people have found for their iPod touch devices once they add GPS capability to them with our GPS Cradle”, said Greg Lukins, VP of Business Development at Dual Electronics. “We have heard from a glider pilot in New Zealand who used the Cradle to test the gliding app he published; from a Search-and-Rescue team in Alberta, Canada where they use their iPod touch devices with apps for topographic maps and GPS tracking; and from many outdoor and fitness enthusiasts who take their iPod touch devices geocaching, golfing, biking and boating”, added Lukins.

The GPS Cradle is available online as well as at several retail stores in the US, including Best Buy, at \$139.99 MSRP. For more product information visit [GPSCradle.dualav.com](http://GPSCradle.dualav.com).
